**Subsector :** A03 **Registration Date :** 2016-09-26  
**Organization :** PKN  
**Country :** Poland  
**Project ID :** 25901126/0001 **Project**  
**Established**  
**ICS :** 85.080.99  
**National Ref :** prPN-T-85003  
**Title :** Postal services -- Envelopes for automatic processing  
**Scope :** This standard, which applies to envelopes for automatic processing by letter sorting machines, gives requirements relating to the formats of envelopes, their symbols, dimensions and dimensional deviation. It specifies requirements for the allocation and reservation of the address side and shows the dimensions and placement of window. It provides requirements for the printing on the address side of envelopes and inside printing of envelopes. It determines requirements for the edges of flaps and patterns, patterns gluing and sealing the envelopes. It gives types and properties of the paper. It stipulates requirements for labeling and packaging. It prescribes tests methods

**Title :** ÖNORM B 5320  
**Title :** Installation of windows and doors in walls - Design and execution of the building connection as well as of the joint for windows and/or doors  
**Scope :** This Austrian Standard shall be applied to the design and execution for fitting of windows, door height windows and external doors in conditioned and non-conditioned buildings or building parts being in direct contact to external climate. Furthermore, this Standard also applies to the fitting of windows between conditioned and non-conditioned rooms. Hereinafter, windows, door height windows and external doors will be shortly referred to as "windows. This Austrian Standard applies to new construction, rehabilitation as well as to the exchange of windows. The present ÖNORM neither covers repair and/or reconstruction of existing windows, nor works in the field of monument protection. Moreover, the present ÖNORM is not applicable to roof windows, roof lights, etc. For fire protection requirements, the applicability has to be checked for each specific case. This Standard does not deal with connection joints within coupled window constructions; these have to fulfil the requirements of ÖNORM B 5300.

Title : Windows. Installation on site

Scope :

This document specifies the systems and technical requirements to be used during the installation of windows on site, offering security to the end user and assuring the performance of the window during its lifetime. This document is to be applied on windows (including and French windows and roof windows) and external pedestrian doorsets, whatever the material they are made of, as defined in the European Standard EN 12519, and whatever it is the type of site and the situation of the window in the wall where it will be fitted. This document is to be applied on windows for new buildings and refurbishment.

This standard does not apply to:

- Fire resisting and/or smoke control characteristics for windows and doors
- Rooflights
- Roof coverings
- Windows and external pedestrian doorsets in escape routes
- Structural windows

**Subsector B09: THERMAL MATTERS**

<b>Subsector :</b>	B09	<b>Registration Date :</b>	2016-09-20
<b>Organization :</b>	ASI		
<b>Country :</b>	Austria		
<b>Project ID :</b>	00026919/0001		Project Established

ICS : 91.120.10

National Ref : ÖNORM B 8110-5

Title : Thermal insulation in building construction - Part 5: Model of climate and user profiles, standard outside temperatures for heating and cooling

Scope : This ÖNORM purpose is to establish conditions for calculating the heating demand and cooling demand in accordance with ÖNORM B 8110-6 and for standards for the calculation of other energy indicators on the energy efficiency of buildings, especially of energy characteristics of the building services (including the standard outside temperatures).

 Title : Gas Measurement Systems  
 Hourly gas measurement devices directly connected to the transportation network  
 Scope : This technical specification defines:  
 - which measure data have to be determined and recorded by each device;  
 - the minimum performance of each gas measurement system and the minimum construction requirements to guarantee the declared performance;  
 - the characteristics and the protocol of each communication port;  
 - additional functions required during maintenance operations to guarantee the performance over time.  
 This technical specification applies to the gas measurement systems in the service of delivery and redelivery stations directly connected to the transportation network.

<b>National Ref :</b>	PNE 88114		
<b>Title :</b>	Fibre-cement profiled sheets incorporating PUR and aluminium foil at the bottom, and fittings. Requirements and test methods.		
<b>Scope :</b>	This document specifies the technical requirements and establishes the test methods for fibre-cement profiled sheets incorporating PUR and aluminium foil coating at the bottom, and its fittings. This document covers fibre-cement profiled sheets that incorporate in a second production process a PUR layer between the fibre-cement and an aluminium foil coating placed at the bottom. This is done by means of an individual injection system. The final product is a slab with better mechanical characteristics and more anti-corrosive resistance. For the purpose of this document fibre-cement profiled sheets are classified according to their height of corrugation and their mechanical characteristics. This document does not include calculations with regard to works, design requirements, installation techniques, wind uplift or rain proofing of the installed sheets.

**Subsector F12: INFORMATION PROCESSING SYSTEMS**

---

**Subsector :** F12 **Registration Date :** 2016-09-20  
**Organization :** ASI  
**Country :** Austria  
**Project ID :** 00026930/0001 **Project**  
Established  
**ICS :** 07.040, 35.240.99  
**National Ref :** ÖNORM A 2261  
**Title :** Catalogue of feature codes for the digital exchange of geographic data - Natural stock  
**Scope :** In the context of the digital exchange of geo-spatial data this standard unifies the semantic classification of geo-spatial objects as well as their attributes and establishes the respective structures. They rely on the tools and structure of GML for the coded transmission of structured geo-spatial data with geometric and semantic components. ÖNORM A 2261 corresponds to the scope of nature inventory data. Nature inventory data describe objects recognizable in nature (also in urban environment, for example city furniture) that are of interest in the large-scale range between 1:200 and 1:1000 and often up to 1: 5000. They serve as a basis for utility network documentation, for municipal administration, for planning and project development, for building authority management and the like. Of primary interest are objects on the ground surface or parts of such objects protruding from the ground surface.

Established

ICS : 07.040, 35.200  
 National Ref : ÖNORM A 2260  
 Title : Interface for digital exchange of geographic data  
 Scope : This Austrian standard facilitates the exchange of structured geo-data (semantically classified vector geometry data, being spatially referenced in terms of position and altitude, with additional attributes) between different users and systems, observing agreed rules for structure and meaning. It follows the standard ÖNORM EN ISO 19136 and thus a GML-based data exchange. The focus is on large-scale applications with quality requirements being common to surveying, communal administration and utility network documentation. By this Austrian standard, geo-data become accessible to a large circle of users. Uniformity, reproducibility, and automation of access augment the quality of decision-making. This Austrian standard belongs to a family of standards (partly existing, partly in development), which pave the way to a geo-information hub that enables searching, ordering, delivering and invoicing of geo-data.

**National Ref :** PNE 175001-2  
**Title :** Service quality for small retail trade. Part 2: Requirements for fishmongers.  
**Scope :** This standard establishes quality requirements for sales activity, additional services and complementary services in fishmongers considered as a small trade , to meet customer expectations regardless of the nature of the comercialized products.

Fishmongers that are sections of other retail formats, specifically, supermarkets and hypermarkets are excluded.

Establishments must comply with applicable law, but it is not the object of this standard to verify the compliance.

This standard establishes requirements for comercialized products , since the quality of service in these establishments is directly related to product quality.

It is not the subject of this standard to establish a management system.

<b>National Ref :</b>	UNI1602158		
<b>Title :</b>	Building acoustics - Guidelines for the installation of doors and windows and other façade components and the sound insulation of the building façade occurs from external noise		
<b>Scope :</b>	The standard defines the criteria for the installation of façade components (clenching and its controlled mechanical ventilation and dumpster device) and provides guidance on sound insulation verification of the facade from external noise. The standard applies to existing buildings and new buildings subject to the applicable laws in the field of acoustics in buildings. The standard applies to the interventions refer only to cases of airborne sound propagation.

**ICS :**  
**National Ref :** PNE 313001  
**Title :** Animal shelters and boarding kennels. Animal health and welfare management.  
**Scope :** The scope of this standard is to:

- Harmonize definitions, concepts and management procedures for the animal shelters (hereinafter CCPAA) and boarding kennels for cats and dogs for the establishment of hygienic, sanitary and animal welfare guidance, based on scientific studies and experience of technical specialists.

- Establish minimum requirements for such facilities and boarding kennels and CCPAA

- Establish a classification of the different types of shelters and boarding kennels according to their facilities and activities.

This standard applies to animal shelters and boarding kennels, public or private, dedicated to the collection and stay of dogs and cats.

This standard is intended for owners of facilities, coaches veterinarians, staff and volunteers that manage, work or collaborate in CCPAA and boarding kennels.

NOTE 1 Throughout the text the word centres is used to refer to both CCPAA and boarding kennels.

NOTE 2 Throughout the text the word animals is used to refer to dogs and cats.
