Project ID :	50002470/0001		Project Established
ICS :	65.040.10		
National Ref :	NEN 7439-1 Concept nl		
Title :	Stable emissions - Validation of automatic measuring and sensor systems for stable emissions		
Scope :	This standard describes the method for validating automatic measuring and sensor systems used for measuring barn emissions. The aim is to ensure the reliability and accuracy of different types of automatic measuring and sensor systems and to ensure that validation results are mutually comparable. The standard specifies the validation criteria and procedures for automatic measuring and sensor systems for measuring emissions such as ammonia, particulate matter, greenhouse gases, and odor.

National Ref : NEN 7439-2 Concept nl
Title : Stable emissions - Continuous measuring
Scope : This standard describes a method for using automatic measurement systems for continuously measuring emissions from livestock farms (stables, manure storage, and manure processing). It involves reliable and standardized measurements of ammonia, particulate matter, greenhouse gases, and odor. The standard specifies technical and operational requirements for the installation of measurement systems in livestock farms and for the implementation and processing of measurements by measuring bodies.

Relatedness :

National : New

National Ref : NEN 7439-3 Concept nl
Title : Stable emissions - Determining emission indicators for emission labels
Scope : The standard describes an integrated measurement method for determining the emission reduction performance of emission reduction techniques and measures at livestock farms (stables, manure storage and manure processing) for establishing emission indicators (ammonia, particulate matter, greenhouse gases and odour).

Relatedness :

National : New

Sector : 01AGRS **Registration Date :** 2025-09-15
Organization : NEN
Country : Netherlands
Project ID : 50002473/0001 **Project Established**
ICS : 65.040.10
National Ref : NEN 7439-4 Concept nl
Title : Stable emissions - Part 4: Emission labels for ensuring the effectiveness of techniques and management measures
Scope : This standard describes the requirements and preconditions for assigning an emission label to emission-reducing techniques and measures in livestock farming. The standard specifies the information that must be included in the emission label. This includes: The measured emissions per parameter, including the uncertainty margin/variation (the emission indicator). Ensuring practical implementation: design, construction, dimensioning, operating requirements, maintenance, monitoring, and reporting. Preconditions, such as (fire) safety, robustness, and animal welfare. Providing insight into potential side effects such as energy consumption and emissions to air, water, and soil.

Title : Animal and vegetable oils and fats and derived products - Determination of peroxide number for margarine
Scope : This standard specifies a method for determining the peroxide value in margarine. The peroxide value is a measure of the peroxide compounds, determinable under test conditions, present due to oxidation. The peroxide value is expressed in milliequivalents or in millimoles or in milligrams of active oxygen per kilogram of product.

Title :	Non-regulated professions - Security professional - Knowledge, skill, autonomy and responsibility requirements		
Scope :	<p>The standard defines the requirements related to the professional activity of the Security Professional, i.e., the professional figure whose knowledge, skills, and competences enable the overall management of the process or of significant sub-processes.</p> <p>Specifically, this standard represents the first part aimed at outlining four levels of the security professional profile, based on organizational contexts of varying complexity. It serves as a useful tool for organizations to better guide their selection of the professional whose level best suits their needs, as well as for all other interested parties.</p> <p>The standard identifies the following specialist levels:</p> <p>Security Specialist</p> <p>Security Expert</p> <p>Security Manager</p> <p>Senior Security Manager</p> <p>The subsequent parts are intended to define the various profiles of the Security Specialist within the broader field of security.</p> <p>These requirements are specified starting from the specific tasks and activities and the identification of the relevant content, in terms of knowledge and skills, also with the aim of clearly defining the level of autonomy and responsibility, in accordance with the National Qualifications Framework (QNQ).</p> <p>The requirements are also expressed in a way that facilitates and contributes to making the related conformity assessment processes as consistent and transparent as possible.</p>		

Note: Certification of individuals in accordance with UNI CEI EN ISO/IEC 17024 is a third-party conformity assessment process. For the purposes of compliance with Law 04/2013, such certification is carried out under accreditation for a specific standard, as also stated in Legislative Decree No. 13 of January 16, 2013 (DLgs 13/2013, [4]).
