**Title :** Audio technical solutions for universal design  
**Scope :** This document describes how equal access to sound is secured for all. The document specifies guidelines for planning, installation, maintenance and use of audio technical solutions for universal design and speech intelligibility at various situations and rooms. The document is applicable for user groups with various needs, for organizational needs and measures, selection and installation of various audio technical devices, their function, range, criteria for receiver solutions, information to users etc., and other practical solutions and guidance. The document gives requirements for receiver solutions. The document describes criteria for protocols for sound transmission with test procedures, operational solutions, and manuals for service personnel. The document describes proposals for solutions or guidance for planning, maintenance, installation and operation in related premises and buildings. The document gives criteria for information and communication about the manner of operation, maintenance, use etc. that are to be given to users and those who operate the devices.
